Edel Elite Supersoft

Edel Elite SuperSoft

The surface of choice

For clubs wishing to distinguish themselves with high quality artificial grass optimised for tennis, Edel Elite SuperSoft is the answer.

Micro curled polyethylene fibres provide a very even and non-directional playing surface. The system contains only little sand, made completely invisible by the micro curled fibres. Play takes place on the turf itself, which allows optimal pivoting and sliding.

After professional installation on a stable base, Edel Elite SuperSoft will require relatively low maintenance and provide an ITF Court Pace Rating 3. Available in two shades of green and terra cotta red, the playing surface can be installed in a single colour or with contrasting colours to the play and run off areas.

Applications

- Tennis Courts
- Multi Courts
- Indoor
