Edel Padel Pro

Edel Padel Pro

The multi-use tennis solution

Padel has been popular in Southern-America and Spain for a long time and is gaining ground in the rest of the world. Edel Grass has developed an all-weather paddle court which can be customised to every single location. The specific playing performance makes the system also suitable for tennis courts. Edel Padel Pro is ITF certified and classified with Court Pace rating Medium (3); this makes it a unique multi-use solution.

The Edel Padel Pro system has to be installed on a stable, free draining base and will require relatively low maintenance. For perfect stability, optimal playing properties and slide conditions, sand infill is required. The combination of the sub-base, yarn and infill results in a system with superb water permeability, uniform and predictable ball bounce.

Applications

- Padel Courts
- Tennis Courts
