# Diamondblade

## The professional choice

Edel Soccer Diamondblade; the professional standard for soccer turf.

Equipped with a unique, diamond shape TenCate fibre, it enhances sliding friendliness and the fibres stay upright perfectly because of the massive core. The high quality and improved wear resistance, results in consistent playing characteristics and a better performance during the lifespan of the turf system. This system is specially designed for intensive use. This top layer is extremely UV-stable and can be used in different system build-ups, for professional and amateur level.

### Applications

- Professional level (stadium)
- Amateur level
- Training facilities
- 5-a-side
