You just got to TRY

excellence

**Our sports grass systems,
suitable for various applications,
all meet our demanding
quality standards and stand
out from the crowd.**

Sports Grass

Edel Grass has an extensive artificial grass collection for sports applications. All 'Made to win!' Our in-company R&D department gives us the ability to design, produce, test and refine our artificial sports grass systems.

They are designed to offer high-quality use during their entire life span. We strive to deliver systems that perform in any climate and can be used in all weather conditions. Therefore we only use materials of the highest quality and work with suppliers that can meet our demanding quality standards.

CHARACTERISTICS

- The best alternative to nature
- Year-round performance
- Uniform playing characteristics
- UV-stable & extremely durable
- Clear maintenance planning

SUSTAINABILITY

- Ecologically responsible produced
- Safe to people & environment
- Meets the strictest environmental guidelines
- Produced with recyclable materials
- Avoids risk of soil contamination

APPLICATION & USE

By involving us in your activities in an early stage, we are able to share our knowledge with you and help you approach your project the right way. We strive to be your partner, to support you in successfully building your projects.

RUGBY systems *made to win*

The intensive team sport

The exact origin of modern rugby is complex. A first form was played in France in the Middle Ages called Soule or Sioule. At the beginning of the 18th century, a kind of football was played at a school in Rugby, Warwickshire, where points had to be scored by holding the ball under the arm. Rugby was introduced to many schools in England in the 19th century and the sport gained worldwide fame.

Rugby is an intensive contact sport in which a good surface is important to prevent injuries. When talking about rugby, people mostly refer to Rugby Union, which is played in leading countries. Generally speaking, a rugby field always consists out of long grass fibers filled with sand and performance infill, built on a shock-absorbing sub-base.

100%  Quality – Made in The Netherlands

Edel Flashblade

Sand – SBR-filled rugby system built on shockpad and bound or unbound sub-base

Edel Flashblade Performance-filled

AFFORDABLE PERFORMER FOR INTENSIVE USE & PLAY

The Flashblade yarn fulfills the needs when a competitive rugby field system according to World Rugby standards is required. With its 12.000 Dtex and matt finishing, Edel Flashblade perfectly covers performance infill and gives the field an outstanding natural look. Due to its flash-shaped yarn, the piles stay upright when played intensively. Built on a shockpad, the system complies with the requirements for rugby applications.

12.000/6 DTEX

Flash shaped yarn

345 µm
Stabilizing core

- **Bi-directional resilience**
- **Perfect wear and tear**
- **Natural bicolor**

excellence

Economic and durable rugby field
Flexible flash yarn shape
Good grip and torsion properties
Optimized ball roll speed and behavior
WR Certified systems

**roll width
400 cm¹**

Length according to
installation schedule,
full length to cover
width of field.

Edel Powerblade

*Sand – SBR-filled rugby system built on
foampad and bound or unbound sub-base*

Edel Powerblade Performance-filled

PREMIUM RUGBY FIELD FOR LONG-LASTING PERFORMANCE

Sometimes it's all in the name. In this case, we couldn't agree more. Edel Powerblade is an extremely durable 410 micron propellor-shaped two-tone yarn. It is designed to build rugby systems that last and perform under the toughest conditions, while offering optimal playing properties, perfect shock absorption behaviour, and the lowest frictional resistance possible.

16.000/6^{DTEX}

Propellor shaped yarn

410^{µm}
Stabilizing core

- **Bi-directional resilience**
- **Minimal wear and tear**
- **Natural bicolor**

excellence

Extreme durable and resilient rugby field
Natural looking field surface
Optimal grip and torsion properties
Low frictional resistance
Perfect shock absorption

**roll width
400 cm¹**

Length according to
installation schedule,
full length to cover
width of field.

Edel Future DS

Sand – Cork-filled rugby system built on shockpad and bound or unbound sub-base

Edel Future DS

Performance-filled

OUR PROVEN STADIUM QUALITY & TOP USE PERFORMER

Our R&D department excelled when they designed the Edel Future DS yarn for performance-filled rugby fields. This is a truly unique yarn within the Edel performance-filled sport fields portfolio. Future DS has proven its status in soccer as well as in rugby for years and still is one of the most loved yarns for building stadium quality and World Rugby certified rugby fields.

12.000/6^{DTEX}

U shaped yarn

2 x 230 µm
Stabilizing dual cores

- **Resilient U-Shaped yarn**
- **Good wear and tear**
- **Natural bicolor**

excellence

- Resilient stadium quality rugby field**
- Natural looking field surface**
- Optimal grip and torsion properties**
- Low frictional resistance**
- Solid fall protection**

**roll width
400 cm¹**

Length according to
installation schedule,
full length to cover
width of field.

Edel Hybridblade

*Sand – cork-filled rugby field built on
shockpad and bound or unbound sub-base*

Edel Hybridblade

Performance-filled

MAINTENANCE-FRIENDLY FIELD WITH NATURAL ESTHETICS

A mixture of diamond-shaped yarns and tape. When a rugby field needs to offer good esthetics besides excellent performing capabilities, Edel Hybridblade delivers. It offers perfect conditions for intense and professional play. The combined yarns and a high Dtex of 18.200/7, make sure that the infill stays in place and excellent wear and tear is provided. Edel Hybridblade was used on run offs and in-goal-areas during the last Rugby World Cup.

18.200/7^{DTEX}

Diamond shaped yarn
+ 5 mm tape

365^{µm}
Stabilizing core

- **Dual-shaped resilience**
- **Eliminates infill splash**
- **Natural tricolor**

excellence

Outstanding performing rugby field

Natural looking field surface

Optimal grip and torsion properties

Low frictional resistance

Durable and maintenance-friendly solution

**roll width
400 cm¹**

Length according to
installation schedule,
full length to cover
width of field.
