excellence

**Our sports grass systems,
suitable to various applications,
all meet our demanding
quality standards and stand
out from the crowd.**

Sports Grass

Edel Grass has an extensive artificial grass collection for sports applications. All 'Made to win!' Our in-company R&D department gives us the ability to design, produce, test, and refine our artificial sports grass systems.

They are designed to offer high-quality use during their entire life span. We strive to deliver systems that perform in any climate and can be used in all weather conditions. Therefore, we only use materials of the highest quality and work with suppliers that can meet our demanding quality standards.

CHARACTERISTICS

- The best alternative to nature
- Year-round performance
- Uniform playing characteristics
- UV-stable & extremely durable
- Clear maintenance planning

SUSTAINABILITY

- Ecologically responsible produced
- Safe to people & environment
- Meets the strictest environmental guidelines
- Produced with recyclable materials
- Avoids risk of soil contamination

APPLICATION & USE

By involving us in your activities in an early stage, we are able to share our knowledge with you and help you approach your project the right way. We strive to be your partner, to support you in successfully building your projects.

TENNIS systems *made to win*

Just hit it

Tennis evolved from a French ball hitting game called 'jeu de paume'. It was king Louis X of France, a fanatic player, who built the first modern style indoor court in the 13th century, which was later copied in palaces across Europe. Around 1600 the racket came into use and the game got its name from the French word tenez ('hold').

During the 18th and 19th century 'lawn tennis' gained popularity and the game developed. The lawn mower was introduced and now grass could also be used for tennis courts. In 1872 the first tennis club was founded in Leamington Spa, England. Modern tennis is played on a variety of surfaces such as grass, clay, and hard courts. Nowadays, artificial grass is intensively applied and one of the most used tennis surfaces.

Edel Advantage Red Court

All-weather red sand-filled high-performance tennis surface

Built on bound or unbound sub-base

Edel Advantage Red Court Red sand-filled

ALL-WEATHER COURT, THE ULTIMATE ALTERNATIVE TO CLAY

Combining the playing characteristics and appearance of clay with the benefits of an all-weather playing surface, Edel Advantage Red Court (ARC) has only to be installed on a stable, free draining base. There are no requirements for watering the surface, so the high costs of a sprinkler installation are avoided. As with traditional clay courts, Edel ARC allows players to slide in a controlled motion allowing coverage of the whole court area.

- **Natural looking court**
- **Playing characteristics of clay**
- **No sprinklers or water needed**
- **Visible ball prints**

excellence

Premium tennis court
Designed for all-weather play

Edel Elite LSR20

*Olive green sand-filled tennis court
Built on bound or unbound sub-base*

Edel Elite LSR20 Sand-filled

AFFORDABLE AND PROVEN QUALITY TENNIS SYSTEM

A sustainable, player-friendly and affordable tennis solution. LSR20 courts are installed on top of a structure designed according to the standards of (inter)national sports associations. The LSR (Low Slide Resistance) yarns remain flexible even at temperatures below zero, offering good playing characteristics the entire year. The system is sand-filled. Players can easily pivot, turn, and slide with a reduced risk of injuries.

- **Leading sand-filled tennis court**
- **Integrated play lines**
- **Maximum durability**

excellence

Year-round performance
Excellent wear and tear
Proven quality and lifespan
Economic choice
ITF classified court pace – 3 Medium

**roll width
372 cm¹**

Length according to
installation schedule.

Edel Elite SuperSoft

Summer green/white/terracotta sand-dressed tennis court

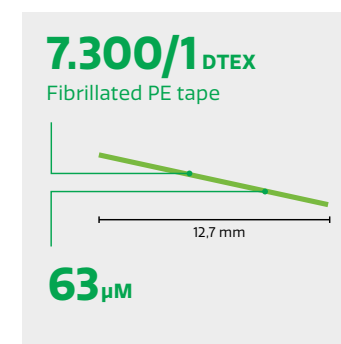

Preferably built on bound sub-base

Edel Elite SuperSoft Sand-dressed

DISTINGUISHING ALL-TIME SUPER PERFORMER

Distinguish your court with high-quality artificial Edel Elite SuperSoft tennis grass. Micro curled polyethylene fibers provide a very even and non-directional playing surface. The system contains almost no sand, which is completely invisible due to the curled fibers. The turf allows optimal pivoting and sliding, making it a super performer. After professional installation on a stable base, Edel Elite SuperSoft requires relatively low maintenance.

- **Thermofixed Knit-D-Knit yarn**
- **Low pile sand-dressed system**
- **Full grass aesthetics**

excellence

Faster play
Low in maintenance
No dragging after playing
Luxurious appearance
Minimal sand infill required

roll width
372 cm¹

Length according to
installation schedule.

Edel Elite Paddle Pro

Terracotta sand-filled multi-use court

Built on bound or unbound sub-base

Edel Elite Paddle Pro Sand-filled

THE MULTIUSE SOLUTION FOR TENNIS AND PADEL

Edel Elite Paddle Pro is developed for all-weather paddle courts and can be customised to every single location. The specific playing performance makes the system also suitable for tennis courts, offering a unique multiuse solution. The Edel Paddle Pro system has to be installed on a stable, free draining base and will require relatively low maintenance. The system has a superb water permeability with uniform and predictable ball bounce.

Padel court

PADEL systems *made to win*

The 2 vs 2 fun game

Padel saw daylight in Mexico in 1969. Since then, it became popular in several countries in south America, such as Argentina. In Europe, padel was first and mainly practiced in Spain. Recently it gained much more popularity in Europe as well as in other continents.

The racket sport padel is mostly played in couples of two against two on an enclosed court of steel and glass. The field is 1/3rd the size of a tennis court. The game style and rules of padel differ from and cannot be confused with paddle tennis, which is mostly played on courts in USA and Canada. For more information visit PadelFIP.com.

100%  Quality – Made in The Netherlands

Edel Padel XT Club

Reflex blue sand-filled padel system

Built on bound sub-base

Edel Padel XT Club Sand-filled

THE ALL-WEATHER SOLUTION FOR EVERY PADEL COURT

Edel Padel XT Club is suitable for all-weather padel courts and can be customized to every single location. The perfect stability, optimal playing properties, and slide conditions make the system perfect for padel courts at any club. It will require relatively low maintenance. The combination of the sub-base, yarn and sand infill results in a system with good water permeability and a uniform and predictable ball bounce.
