

Geometric 3d yarn structure

Edel Twinblade

Mixed yarn football turf for mineral infill systems

- **Friendly** playing surface
- Solid underfoot **structure**
- **Dense mixture** of yarns
- Natural playing **behaviour**
- **Perfect** shock absorption

Edel Twinblade

MIXED YARN FOOTBALL TURF FOR MINERAL AND PERFORMANCE INFILL SYSTEMS

Our Edel Twinblade is a mixed yarn turf that is particularly suitable for installing an approved, non-directional and durable football system with mineral infill sand. Although it can also be installed as a high-quality 3G football system on a shockpad. The combination of geometric shaped straight and texturized yarns create a dense 3d structure and give the pitch a natural appearance offering player friendly behaviour.

Characteristics

- Robust and durable surface
- Straight and texturized yarns
- Mineral and performance filled systems
- Shockpad or E-layer required
