Edel Fortix Go
Rubber-free mineral-filled artificial turf
The new benchmark for mineral fill
Exclusive Fuse-to-Curl™ technology
No rubber crumb or performance infill
Excellent grip and ball roll
Easy-to-maintain, future-proof solution

Edel Fortix Go

THE NEW BENCHMARK FOR MINERAL FILL

Edel Fortix Go features Fuse-to-Curl™ technology to set the standard for mineral-filled artificial turf systems and football pitches. Mineral-filled means it is a rubber-free artificial turf system with no performance infill. Just a layer of mineral sand for added stability and grip.
Its lower pile height and a open density distinguishes it from our completely infill-free system Edel Fortix. The structure allows the sand to spread evenly through the system. The curled fibres hold it in place and give the pitch lasting resilience.

Characteristics

- **Mineral-filled sports system**
- **Fuse-to-Curl™ technology**
- **No rubber or performance infill**
- **Even sand distribution**
